  - ◆ Medical Prime Vendor
  - ◆ Meals for ships
  - ◆ Better SIM support
  - ◆ Corporate Express

# FISC Contracting

## Urgency Key Points:

- Lack of planning does not support urgency.
- Expiring funds/late release of funds does not support urgency.
- Only the Government's immediate minimum quantity requirement can be purchased under urgency.

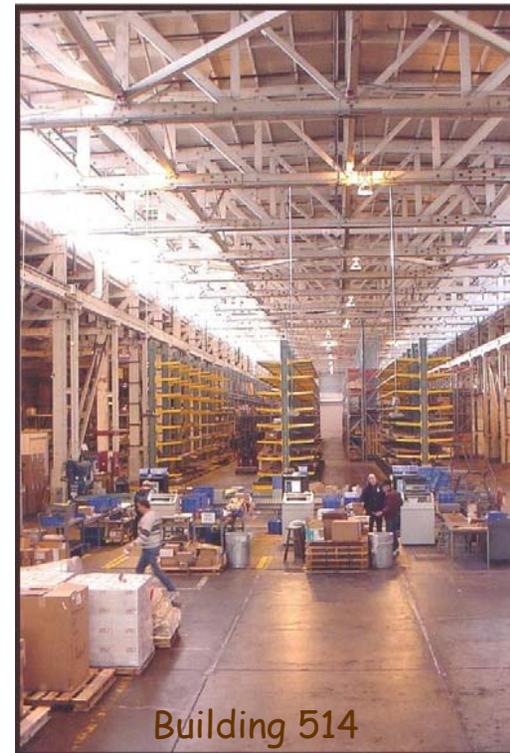

- Dealer competition (different dealers offering the product of the **same manufacturer**) is sole-source.
- You must explain the unique features/function of the item and why only one manufacturer can provide it. Discuss why a similar product from another manufacturer will not work.
- If sole source is based on compatibility issues, you must identify and provide the value of existing equipment, and discuss potential costs associated with replacement of the entire system.
- When proprietary data is the reason for the sole source, you must explain the steps taken to verify that the OEM will not release the proprietary information.

## FUNDING

- FISC can start procurements without funds. **Funding is not required until the contract is actually placed.**
- Therefore, if you want to start a procurement, but funds aren't available yet, please contact your Contract Specialist on how to proceed.

# Physical Distribution (C300)

- Customers:
  - ◆ PSNS/IMF and SWFPAC
